EDUCATION

HO CHI MINH UNIVERSITY OF TECHNOLOGY AND EDUCATION

Bachelor of Information Technology, March 2024

GPA: 3.07

EXPERIENCE

Front-end Developer | Unicloud:

Sep 2022 – Jan 2023

- Modernized an existing internal system feature used by Kien Long Bank Tellers, including a redesign of the UI
- Developed modularized React components, which allowed for easy unit testing
- Prototyped a component library that is customized and flexible for an internal purpose

Front-end Developer Intern | Unicloud:

June 2022 – Sep 2022

- Constructed a game platform by using ReactJs
- Developed projects landing page which belongs to the Unicloud ecosystem
- Researched new technology in Front-end, Vite, Vitest, and SWR to name a few

Front-end Developer Collaborator | LmssPlus:

June 2021 – Feb 2022

- Developed new React components for lmssplus.com with regard to learning about Html, CSS, React, and layouts basic knowledge
- Created internal component library with Vite
- Prototyped a Node.js API so as to gain a view of how the modern application works

PROJECTS

LMSS Chat / Mobile App (React Native, Redux)

- Used React Native to develop a mobile chat app
- Leveraged Redux architecture to manage the application states

Pizza (NuxtJs, Go, Okteto, Vercel)

- Created an e-commerce web app to sell pizza which integrates online payment
- Deployed API Layers in a containerized environment with Docker and Okteto
- Unit test coverage of over 70% (Vitest and go test)
- Apply Uncle Bob architecture - Clean architecture in order to separate business logic, framework and data store for scaling, and adapting

Markdown Vue (VueJS)

- Developed a component to render markdown in VueJS
- Avoided XSS attack by default by using AST (Abstract syntax tree) to parse components instead of using v-html or innerHTML

Languages and Technologies

- HTML, CSS, Typescript, Rust, Go
- Git, AWS, NextJs, Fiber, Tailwind Css, PostgreSQL, Docker, Linux
